**Our Professional Grade Fire Fighting Water Trailers
MEET OR EXCEED NFPA, USFS,
NATURAL RESOURCES STANDARDS.**

COMMERCIAL GRADE

WATR . . .for fire control, dust control, general watering applications and numerous other areas requiring high discharge pressures.

Hose reel assembly — standard on high pressure water trailers; features 1" x 50', 200 PSI rated hose with fog fire nozzle for variable spray options.

Reel is supported by industrial bearing for easy deployment and wind up

- **High capacity polypropylene tank** holds 525 gallons of water and includes internal baffles to dampen shifting water loads during transport.
- **Simple water flow controls** combined with reliable MQ pumps ensure problem free operation.
- **Smooth highway and job site towing** assured by a dual axle design with ample ground clearance to negotiate rugged terrain.
- **Brake actuator options** included electric and hydraulic surge systems. Height adjustable channel permits multiple hitch options.
- **Made in the U.S.A.** —trailers are DOT compliant and powder coated for durability.

Rear spray bar is capable of producing a cone of water from 8' (gravity flow) to 36' (pressurized flow)

PROFESSIONAL GRADE

FIRE FIGHTING WATER TRAILERS
Meet or Exceed NFPA, USFS, Natural Resources Standards.

OPTIONS. These are customizable to your specifications:

- Professional around the pump foam packages
- Custom storage options
- Hose options
- Fire pump options
- Working lights
- Rear spray bar
- Side spray nozzles
- Custom trailers with larger storage area
- Custom paint
- Hitch and or brake options

WATER TRAILERS
